A vibrant underwater scene featuring a coral reef. The reef is composed of various types of coral, including large, branching structures and smaller, more rounded forms. The colors of the coral range from deep reds and oranges to bright yellows and greens. Numerous small, colorful fish are swimming throughout the scene, creating a sense of movement and life. The water is clear, allowing for a good view of the reef and its inhabitants.

A wide-angle photograph of a coastal scene. In the foreground, large, light-colored, textured rocks frame the view. Beyond them, the deep blue sea stretches to the horizon. Several small, rocky islands or islets are scattered across the water. The sky above is a vibrant blue, filled with wispy, white clouds.

# MEDES ISLANDS

An aerial photograph of the Great Barrier Reef. The foreground shows a vast, shallow lagoon with turquoise water, dotted with numerous small, brownish-red coral reefs. A sharp, dark blue line marks the reef edge where it meets the open ocean. The sky above is a clear, pale blue with a few wispy clouds.

# GREAT BARRIER REEF

©Jon Connell

An aerial photograph capturing the iconic Rock Islands of Palau. The image shows numerous small, green, forested islets scattered across a vast expanse of vibrant turquoise and blue tropical waters. The horizon is visible in the distance under a clear blue sky with a few wispy clouds.
